DETAILED ACTION

Election/Restrictions

1. Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 4-7, directed to the species of figures 6, 7 and 8 are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 2, it is unclear what is considered to be the recited "brake". More specifically, claim 1 recites "a braking element" and then recites "a brake" as a separately claimed element. Also, page 12, line 6 to page 13, line 12 and page 14, lines 14-17 of the specification of the instant application appear to disclose that the braking element includes the suction belt 3.8 as well as the elements that cause the sheet to be sucked to the suction belt (e.g., the suction box and the openings in the

belt). In claim 2, on the other hand, applicant appears claim **parts** of the **braking element** (e.g., the suction box) as structure for the separately claimed **brake**. In view of the additional fact that there is a separate brake shown as reference numeral 3.22 in Fig. 2 of the instant application, it is confusing as to what is the brake and what is the braking element in view of the language of claim 2. Stated another way, the friction in the system between the belt 3.8 and the suction box 3.14 appears to occur as part of the braking element, while brake 3.22 appears to be what should be considered the separately claimed brake. Thus, claim 2 is confusing and appears to be inaccurate.

Response to Arguments

3. Applicant's arguments with respect to claims 2 and 3 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

4. Claims 1 and 4-8 are allowed. Claims 2 and 3 would be allowable if amended to overcome the 35 U.S.C. 112, second paragraph rejection above.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
